

Application No. 10/002,102  
Supplemental Amendment

Customer No. 01933

Amendments to the Specification:

Please amend the paragraph at page 52, lines 10-20 as follows:

For the rotation disk of this embodiment, a rotation disk 29 is divided into two concentric areas as shown in FIG. 23A, and the translucent section slit width  $L$  is identical for outside areas 291, 293 and inside areas 292 and 294, and the cycle  $W1$  of outside translucent section and shield section and the inside cycle  $W2$  are made different in width as shown in Fig. 23B. A different direction area ~~603~~ 293 is disposed outside ~~2-1~~ 2X1 in width, a different direction area ~~604~~ 294 is disposed inside its width ~~2-2~~ 2X2, and patterns of this portion are orthogonal to the other portion.
